Date: February 2, 2015

TRI Air Testing Celebrates 40 Years!

AUSTIN, TX. On February 2, 1975, Dr. J. Scott Thornton founded the company that became Texas Research International (TRI). TRI Air Testing was there in the beginning and served as one of the chief drivers in the organization's establishment.

Today, TRI is a diverse technology, scientific and services company; and TRI Air Testing remains a central component. We are proud to be part of this history of success, which now includes multiple international divisions/companies

interacting in a broad range of industries. We thank all our customers for being part of our story.

About TRI Air Testing Inc.

TRI Air Testing, Inc, an AIHA accredited laboratory, provides compressed air and gas testing for food, beverage, medical, pharmaceutical, industrial, government/military, fire and dive industries. Our [patented air/gas sampling equipment](#) was designed originally for the U.S. Navy Diver's air sampling. We provide the dependability of 40+ years of operation, an extensive suite of industry-specific tests for safety and compliance, 24-hour turnaround on (most) tests, and secure, round-the-clock, online access to reports via MyAir. Solutions for compressed air testing to international standards are provided with excellence in science and quality.

Additional information on the company is available at www.airtesting.com .
